

*Dear Constance,*

*Please share this little bit of Las Vegas fun with your wonderful staff. You were very perceptive as I shared my need for an anti-anxiety medication during a long lonely wait in the dressing cubicle. Beginning with the needle biopsy, I felt like I was being led with kid gloves through a very stressful time. Everyone was encouraging and very helpful. Josephine's compassion when I was given the diagnosis was deeply heartfelt and I appreciated her guidance in a difficult time.*

*Thank you and God Bless you all for your passion to care for each and every person whose life changes the moment they hear the cancer diagnosis.*

*Sincerely,*
